The lace is accented with gold leaf, which is applied to the raised parts of the design, creating a shimmering, textured effect. The lighting is warm, highlighting the delicate structure of the lace and the metallic sheen of the gold.

BIOLOGIQUE RECHERCHE FACIALS

Biologists, physiotherapists and doctors have leveraged their complementary knowledge to write a revolutionary story in the world of cosmetic treatments. Today, a clinical approach to aesthetics combined with pure, concentrated products almost in their natural state along with rigorous state-of-the-art protocols are the foundation of this new generation methodology. A holistic view of the skin as an organ, directly related to all others results in innovative skin care products that are recognised as having a profound effect on the structure of the epidermis.

Any treatment reservation of 50 minutes or more entitles you to access to the Spa area one hour before the start of the treatment (excluding beauty, hair salon and yoga).
